

High Order Testing

Team: Nanxin Jin, Weijie Meng, Yang shi, Jintao Zeng, Yaoxi Liang

Defect No.	Defect Description	Defect Severity	Type of Higher-Order Testing	Test Case No. OR Description
1	Not able to log in with purdue career account	2	Facility	1.1
2	Registration success with invalid email information	1	Usability	1.3
3	Registration success with invalid name information	1	Usability	1.3
4	Instead of showing error message, the website is down when a student is trying to add another student	2	Performance	2.2
5	Add student success when trying to add an RA's account	2	Performance	Logged in as RA and add myself to the floor
6	'Add war' button does not work	1	Usability	4.1
7	Successfully request a war with invalid war date	1	Usability	4.2
8	No error message shown when requesting a war with invalid opponent floor selected	2	Performance	4.3
9	Instead of showing error message, the website is down when trying to approve a war as a student	2	Usability	5.2
10	The title of Your Building's Floors is always Floor2 no matter what floor the RA chooses when RA registers when there are more than 2 Floors request a war.	1	volume	Choose a floor other than floor 2 when register, and then login and "open Your Building's Floors"

11	The drop down list is malfunctioning in some way, which has a big chunk of space among each floor	1	Configuration	When choosing opponent among each floor
12	When a student user rejects a war, the web fails to alert the user s/he cannot deny the war, and the web redirects to a blank page	1	Performance	6.2
13	When RA inputs an invalid score (include character), no error message shows up and RA can still submit the invalid input score.	2	Usability	7.2
14	When a student user inputs a score, no error message shows up and the web redirects to a blank page and can not get back	2	Performance	7.4
15	A RA can input score for result even when the war has not been approved or denied	1	Performance	If the war has not been approved or rejected, RA should not be able to input result
16	A RA can still input score for both teams even the war is rejected	2	Performance	Input the score after a war is rejected
17	A user can view the results even when the war has not been approved or denied.	2	Performance	8.1
18	A user should be able to view the results, but user cannot view the opponent's score	1	Facility	8.1
19	The "wins" becomes -1 when the floor loses in the first round.	1	Stress	8.1
20	The opponent's name is messed up in the war list.	1	Usability	8.1

21	A user should be able to view the overall record for each floor, but there is no such function in the web.	2	Facility	10.1
22	Multi-floor tournaments can't be set up by either a RA or student.	2	Performance	11.1
23	Students are not able to comment on floor war ideas.	2	Facility	12.1
24	RA is not able to set up floor dinners using the same infrastructure used for planning wars	2	Facility	14.1
25	As a student, the Add Student button takes user to a blank page instead of giving an warning	2	Performance	Logged in as a student and then click the add student button. To test whether the add student button works correctly when the user is a student.
26	The sql queries are exposed when someone is trying to login with his or her own account	2	security	The sql query should be hided in the console, in case someone is trying to check others' account information
27	When a RA is trying to add students iteratively, there is no way to stop this operation from crashing the database and views	1	Storage	There should be some storage management function to prevent overloading too much information
28	The status of the war after clicking the "view" always shows as "approved" even	1	Usability	The status of the war should be pending before

	though the RA has not approve/deny the war.			RA has approve/deny
29	After giving the second team a score, it does not show up on the view page of that war while score for the first team shows up normally	1	Usability	The view page should show scores for the second team too.
